

Getting Updates:

git pull

May have to update fork on GitHub if this doesn't work then try again

Opening Jupyter lab:

- Change directory to **CSCI160_Fall2025**

cd CSCI160_Fall2025

- Activate conda environment

conda activate cs160

- Open Jupyter lab

jupyter lab

Adding changes to GitHub

First Time:

git add --all

git commit -m "message about what you did"

git push

Enter your git hub user name

Enter the Personal Access Token that you created (the characters will not show up as you type but they are being entered)

Every other time:

```
git add --all
```

```
git commit -m "message about what you did"
```

```
git push
```
